Detailed Description

Detailed Description

... the information resources of the other management processes - quality
management, environment management, and project management.

In order to delineate the responsibilities of the Information
Management team, it is useful to state...that one folder contains all the
include files one folder contains the source modules, one **folder**
contains executables, and so on.

Folders can also be organized functionally so that all the common
components reside in one folder...

...assume that closely linked files (for example, source and object
modules) reside in the same **folder** .

Another important distinction is the one between work in progress and
completed documents that have...

...Keep the folder structure under central control.

* Within personal folders, allow users to create any **folder** structure.

Clearly assign ownership for the contents of each **folder** .

* Document each **folder** , either in a central location, or in the form of a readme type file within...

PRODUCT NAMES: SmartCenter 2.0 (756482)

TITLE: A Smarter Way To Organize Files: Lotus' SmartCenter 2.0 Will
Help...

AUTHOR: Smith, Gregory Angus, Jeff
SOURCE: Information Week, v770 p87(2) Jan 31, 2000
ISSN: 8750-6874
HOMEPAGE: <http://www.informationweek.com>

RECORD TYPE: Review
REVIEW TYPE: Review
GRADE: A

Lotus Development's not yet available SmartCenter 2.0 should provide excellent features that can increase productivity for the one-third of users who use only the minimum set of Windows features. SmartCenter 2.0 has been included in SmartSuite, but will soon be a standalone product usable with Microsoft Office or WordPerfect Office. SmartCenter 2.0, a scaled-back access and filing system for the most important files, is easily navigated with a cognitive map that can be understood by any user who works in an office. The metaphor used is based on file drawers that hold folders that in turn hold items. Administrators can develop a set of drawers and folders that fit the work habits of each user. SmartCenter ships with default drawers, including tasks, calendar, and contacts. An Internet drawer is also provided and supplies a set of bookmarks that provide quick access to **Web pages**. When Windows users add **personalized** drawers and **folders** to their desktops, their Windows-based productivity problems can be eliminated because files can be dragged-and-dropped to or from the drawers' folders, which keeps disk navigation to a minimum.

REVIEW TYPE: Product Analysis
GRADE: Product Analysis, No Rating

CheckOut.com's CTO, Edmond Mesrobian, chose an in-memory database from TimesTen Performance Software to personalize entertainment information and **Web pages** for customers of the **site**, which sells music, movies, and games. In-memory databases retrieve data much faster than conventional disk-based databases because retrieval is not hampered by the slow process of culling information from disk drives. In-memory databases meet the increasing needs of Web merchants for quick, high-volume data delivery and can process all types of transactions and activities, including **shopping carts**, **personalized World Wide Web pages**, and targeted banner ads. TimesTen also provides an advanced way to process data in RAM, replication abilities for copying, and synchronization of data for better reliability. Most **Web sites** attempting to speed data retrieval and **Web page** redraw use data caching, which leaves parts of the most relevant data in RAM for quick retrieval by the Web server. However, even the most advanced of these methods rarely equals the performance benefits of in-memory stores. Egreetings, which was recently ranked as the eighth-highest hit volume of all World Wide **Web sites**, also uses TimesTen to handle its processing load and reports that the in-memory database has totally eliminated response speedbumps. Only a few vendors, including Angara E-Commerce Services, Polyhedra, and TimesTen, sell in-memory databases to Web companies, and vendors in the relational database market have shown little interest in the in-memory market.

PRODUCT NAMES: Dollardays.com (777323)

TITLE: Web Marketplace To Bring Close-Out Industry Online
AUTHOR: Wilder, Clinton
SOURCE: Information Week, v758 p98(1) Oct 25, 1999
ISSN: 8750-6874
HOMEPAGE: <http://www.informationweek.com>

RECORD TYPE: Review
REVIEW TYPE: Product Analysis
GRADE: Product Analysis, No Rating

Dollardays.com, a new business-to-business Web marketplace, will link buyers with sellers of discounted close-out merchandise left over from manufacturers' production overruns, mislabeled packaging, retail overstock, and many other conditions that generate useful, salable, close-out products. Dollardays.com has retained the services of BTEK Software to update its SQL database and **customized shopping cart** to process what is hoped will be large amounts of World Wide Web traffic. Dollardays.com has signed on about 200 of the U.S.' largest regional close-out distributors to provide products. The president of Dollardays.com says 'This is a niche that hasn't yet made it to the Web...It's a very

fragmented industry that we want to consolidate, to help buyers who are looking for products, and to allow distributors and manufacturers sell into territories they otherwise couldn't.' Buyers and sellers will not be required to register on the site, but registered users will obtain more discounts. Consumers can buy at Dollardays.com, but suppliers will not sell many individual items since the Dollardays.com online catalog will be made up of product lots. A spokesperson for the National Retail Federation says Dollardays.com is a perfect fit for the Web, which offers a new pricing and distribution model for dealing with overstocks.

PRODUCT NAMES: Microsoft Windows 2000 Beta 3 (722367)

TITLE: Inside Windows 2000 Beta 3
AUTHOR: Finnie, Scot Yegulalp, Serdar
SOURCE: Windows Magazine, v10 n7 p37(5) Jul 1999
ISSN: 1060-1066
HOMEPAGE: <http://www.winmag.com>

RECORD TYPE: Review
REVIEW TYPE: Product Analysis
GRADE: Product Analysis, No Rating

An overview of Microsoft Windows 2000 Beta 3 highlights new and improved features and areas that still need work. Users can obtain Beta 3 versions of Windows 2000 Professional (five licenses) and Windows 2000 Server (two licenses) by ordering from Microsoft's World Wide Web site. For an additional fee, Advanced Server Beta 3 is available. Microsoft has already provided 250,000 free Beta 3 licenses to corporate users. The most persuasive reasons to migrate to Windows 2000 center around architecture, and can also relate to services provided with Active Directory or the three server editions of the OS. Windows 2000 will provide mobile and roaming enhancements, better reliability, Windows Installer services, and new trouble-prevention and management tools. It also provides an update to the NTFS file system that introduces encryption, Plug-and-Play device detection and configuration, and new support for many types of devices, including USB, Zip drives, infrared, and digital cameras. Many smaller user interface changes add up to more ease of use for inexperienced users. For instance, a new Welcome box tells users to click the Start button and provides an animation that shows how to click the left mouse button. Several user tips are provided, including some for using **Personalized folders** and a trick that allows access to every document or image file on the hard disk.

PRODUCT NAMES: SmartCenter 1.0 (756482)

TITLE: Lotus utility grabs Web, Organizer data
AUTHOR: Kramer, Matt
SOURCE: PC Week, v16 n20 p53(1) May 17, 1999
ISSN: 0740-1604

RECORD TYPE: Review
REVIEW TYPE: Review
GRADE: B

SmartCenter 1.0 from Lotus is a good desktop utility that allows users to easily access often-used **Web sites** and files from within Lotus Organizer, though the utility is limited to only personal use due to a lack of any management features or organizational options. SmartCenter, which is a free download through October 1999, also operates as a standalone desktop utility that provides a basic calendar, address book, and reminder lists. Though SmartCenter only sends data from Organizer's personal information manager, future versions and updates will extend this function to Microsoft's Outlook PIM, Lotus's Domino database server, and other applications once Lotus begins selling the free utility in October. All information within SmartCenter is easily accessed from the desktop using handy pull-down **folders**, and **customizing** utility functions and sharing **folders** between users is easy to perform. Management features are expected to be possible with SmartCenter when Lotus releases a software developer's kit for that purpose later in the year.

Win98: the complete guide

Blackwood, Jonathan; Elgan, Mike; Heller, Martin; Henderson, Tom
Windows Magazine , October 1, 1997 , v8 n10 p195-216, 13 Page(s)
ISSN: 060-1066

Company Name: Microsoft
Product Name: Microsoft Windows 98
Languages: English
Document Type: Articles, News & Columns
Hardware/Software Compatibility: IBM PC Compatible
Geographic Location: United States

Describes various features of the coming Windows 98 operating system, noting that it provides better performance, an all-new system-wide automation utility that replaces DOS batch files, support for the newest hardware, better security, and faster, easier Internet connectivity. Explains that Win98's Web View allows single-click navigation and enables you to **customize** the appearance of **folders**. Reports that the Active

Desktop lets you turn **Web pages** into wallpaper and screen savers, and that the taskbar allows you to minimize all open apps and folders. Says that there are three levels of Webcasting: Basic, consisting of automated, scheduled crawls of **Web sites**; Managed, which uses a channel definition format file to guide the crawl; and True, which uses IP multicast technology to broadcast over a local network. Also covers performance, device support, new Internet applets, and power-user utilities. Includes 20 screen displays, and four sidebars. (jo)

US 20020026386	A1		16	G06F-017/60	Provisional application US 2000225918 Provisional application US 2001277886

Abstract (Basic): US 20020026386 A1

NOVELTY - A category overview page automatically categorizes the items placed in a **personalized folder**, based on the categories used in the item hierarchy (100) and displays the categorized items. Each major category over view page includes links to each of the other category overview pages.

DETAILED DESCRIPTION - INDEPENDENT CLAIMS are also included for the following:

(a) Items displaying web site;

(b) Items selling web site

USE - For commercial, retail web sites used for selling electronic products such as DVD player, portable MP3, television, video cassette recorder, computer.

ADVANTAGE - The feature offers the full functionality and access to the information available through main portion of web site. Allows the user to make a well-researched buying decision over multiple visits to the web site. The prices of the items can be automatically updated to reflect current sales and promotions. By the inclusion of links in the major category page, a user is enabled to go easily between the product detail pages. Hence, an easy navigation between preselected detailed pages on selected products is provided.

DESCRIPTION OF DRAWING(S) - The figure shows the schematic view of the navigational flow in a web site.

Abstract (Basic): WO 200225470 A1

NOVELTY - The standardized computer document folders consistent with role of users, in insurance process, are created and are **hierarchically organized** into folder structures. An insurance quotation request, is created based on received insurance data entry templates having fields satisfying insurance industry standard for submission of exposure information and a document containing insurance requirements and are sent to insurers.

DETAILED DESCRIPTION - INDEPENDENT CLAIMS are also included for the following:

- (a) Networked computer system operation method;
- (b) Information device operation method;
- (c) Recorded medium storing program for managing web-enabled collaborative insurance process;
- (d) Information device;
- (e) Web-enabled collaborative insurance management system;

- (aa) Activities **tracking** method;
- (bb) Activities **tracking** system;
- (cc) Recorded medium storing activities **tracking** program

USE - For managing web-enabled collaborative insurance process in business **organization** such as insurance industry.

ADVANTAGE - **Compares** quotes for recommending a policy based upon preselected criteria including criteria collaboratively selected by client, advisor and/or the broker. Automatically alerts insurer and broker when request for quotation or the quotation is posted. Quality of service, customer relations and worker morale are improved thereby improving efficiency of the insurance industries.

DESCRIPTION OF DRAWING(S) - The figure shows a flowchart for insurance management method.

Patent No Kind Lan Pg Main IPC Filing Notes
US 20020016750 A1 15 G06F-017/60 Provisional application US 2000212575

Abstract (Basic): US 20020016750 A1

NOVELTY - Customers upload barcodes using personal scanner to centralized data repository (111) which stores data in User's folders, view product information in the Products Database (109) on these appliances; **organize** their Shopping Lists (or Folders) by dragging and dropping products from one Folder to another; and use folders to directly check out and place Orders without having to re-enter their billing, shipping, and credit card information.

DETAILED DESCRIPTION - There is also a component that detects and recommends a Substitute when a product, which the customer wishes to buy, is not available in the store.

INDEPENDENT CLAIMS are also included for the following:

- (1) A system and method that permits a user to drag and drop information from one folder to another using drag-and-buy techniques,
- (2) a system and method to search and recommend product substitutes when a desired product is not available in the Products Repository.

USE - For a system and method for Shoppers to facilitate their Shopping experience by creating and managing Accounts (to store their Billing, Shipping, Credit Card information and Shopping Lists or Folders) through an interactive Communication Network, such as the Internet, using Barcodes Scanners and other computing or communication appliances.

ADVANTAGE - The system provides a simple method for customers to efficiently e-shop and minimizes customer actions and processes involved, particularly for those customers who shop for almost a fixed set of items or products on almost a regular basis--by allowing the creation, storage and management of Shopping Lists.

DESCRIPTION OF DRAWING(S) - Product database (109)

Abstract (Basic): US 20020026386 A1

NOVELTY - A category overview page automatically categorizes the items placed in a **personalized folder** , based on the categories used in the item hierarchy (100) and displays the categorized items. Each major category over view page includes links to each of the other category overview pages.

DETAILED DESCRIPTION - INDEPENDENT CLAIMS are also included for the following:

- (a) Items displaying web site;
- (b) Items selling web site

USE - For commercial, retail web sites used for selling electronic products such as DVD player, portable MP3, television, video cassette recorder, computer.

ADVANTAGE - The feature offers the full functionality and access to the information available through main portion of web site. Allows the user to make a well-researched buying decision over multiple visits to the web site. The prices of the items can be automatically updated to reflect current sales and promotions. By the inclusion of links in the major category page, a user is enabled to go easily between the product detail pages. Hence, an easy navigation between preselected detailed pages on selected products is provided.

DESCRIPTION OF DRAWING(S) - The figure shows the schematic view of the navigational flow in a web site.
